Duties

Under the administrative direction of the DPM IV, the SSS III is responsible for the overall network architecture of the California Lottery Information Technology Services Division. The SSS III will lead and provide advanced technical support and expertise in activities related to network configuration, cloud technologies, wireless, security, and WAN/LAN redundancy for disaster recovery.

Desirable Qualifications

Competitive applicants applying for the position will have the following:

- Mastery-level skill in network architecture design, analysis, administration, configuration, installation, operation and maintenance experience in supporting very large and complex WAN/LAN, VOIP, and IT systems.
- Skills in network optimization, QoS, protocols, and tools to monitor/report network health (WildPackets, WireShark, Sniffers, SolarWinds, etc.)
- Experience or knowledge of network virtualization, and SDN.
- Ability to diagram and explain network architecture concepts and designs
- Persistently fosters a culture of integrity, teamwork and innovation; models organizational values, both in communication and in action; and consistently aligns decisions and activities with organizational goals.
- Ability to act tactfully in difficult situations, negotiate and resolve issues without confrontation, follow guidelines, assist others, and communicate in a clear and concise manner.

Who Should Apply

Applicants must have current list eligibility for appointment to this class, or be a State employee who has transfer eligibility or is currently in the Systems Software Specialist III (Technical) classification. Applications will be screened for eligibility and only those that best meet the requirements of the job will be considered. Appointment is subject to SROA/Surplus provisions.
